

MODULAR SYSTEMS FOR ANY MANUFACTURING, MAINTENANCE OR SERVICE ENVIRONMENT

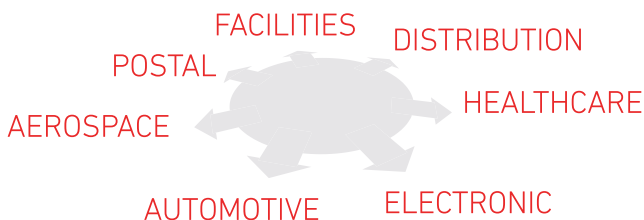

tubeandbracket.com

SOLUTIONS

We provide bespoke solutions to store, handle and transport. Optimising workspace, reducing waste and allowing for the rapid implementation of Kaizen continuous process improvement.

For 25 years we have led the way in modular solutions for materials storage and handling. World-wide logistical support is provided by TRILOGIQ branches in 18 countries.

BENEFITS

Our modular solutions enable you to improve your productivity.

- **Facilitates** 5S, lean and Kaizen organisation
- **Reducing Mudas** and non value-added processes
- **Visual Management** displaying relevant information clearly, where it is most useful
- **Workplace Organisation**, ergonomic and efficient. Ensuring every part is in the right place at the right time

SERVICE

- **Full technical support**
From concept to completion of fully built applications
- **Unique bespoke solutions**
We design and build custom solutions for your specific parts and processes - including large, heavy, delicate or awkward components
- **On-site building and training available**
Enabling rapid adjustments, should your process change
- **Flexible Service Options**
We can work in a way that suits you. Complete Assembled Solutions
On-site Build or Bulk Component Supply

SYSTEMS

Our modular GRAPHIT (composite) and LEANTEK (steel) systems provide many advantages over traditional fabricated structures, including:

- **Lightness** (reduced manual load) and improved ergonomics
- **Strength & durability** in demanding environments
- **Non-aggressive design** for protection of valuable parts
- **Easy maintenance** of all components
- **Completely adjustable** and customisable
- **Infinitely reusable**
