

Product Service

# CERTIFICATE

No. B 08 04 18894 037

**Holder of Certificate:** Kee Safety Ltd.

1 Boulton Road  
Reading  
RG2 0NH  
UNITED KINGDOM

**Production Facility(ies):** 46030**Certification Mark:****Product:** Pipe connector**Model(s):** Kee Lite pipe joint connection

<b>Parameters:</b>	Couplings: L 10, L 14, L 15, L 19, L 20, L 21, L 25, L 26 L 45, LF 50, LM 50, LB 54, L 114 LM 58, L 61, L 62, L 68, L 152 L 150, L 164 (only size 8) 7 and 8 Aluminium alloy A 356-T6
Flanges:	L 45, LF 50, LM 50, LB 54, L 114 LM 58, L 61, L 62, L 68, L 152 L 150, L 164 (only size 8)
Sizes:	7 and 8
Material:	Aluminium alloy A 356-T6
Range of application:	i.g. Guard railings, racking, bracing the fittings are not suitable for the use in scuffoldings

Further technical data see page 2 and 3

**Tested according to:** PPP 52175:2001

The product was tested on a voluntary basis and complies with the essential requirements. The certification mark shown above can be affixed on the product. The certification mark must not be altered in any way. See also notes overleaf.

**Test report no.:** 70027372

Date, 2008-04-03

Product Service

**Technical Data****Material:**

Pipe joint connection:  
Clamp screw:

Aluminium alloy A 356 - T6  
Casehardening steel, organic zinc

**Starting torque of the set screw:** 39 Nm

**Safety factor:** 2,0

**Safety notes:** The permissible working load of the set screws, fixings and building materials must be considered when selecting the type of mounting for the flanges of guard railings.

Only on the condition that the fittings with bottom and wall flanges are mounted on a plane underground the allowed bending moments applies.

Due to dynamic load influences screwed connections may loosen. The tight fit of all screw connections must be checked at regular intervals and tightened up if necessary. The interval depends on the respective use and must be laid down by the operator.

The permissible tensile and slip loads are differentiated between tubes with one and/or two clamp screws gripping on the tube.

The following abbreviations are used in the table:

- |                                       |           |
|---------------------------------------|-----------|
| 1 clamp screw, gripping of the tube:  | 1 cs-g-t. |
| 2 clamp screws, gripping of the tube: | 2 cs-g-t. |

**CERTIFICATE**  
**Nr. B 08 04 18894 037**

- <sup>1)</sup> The fittings named LF 50, LM 50, LB 54, LM 58 and L 19 are not suitable to absorb bending load, bending moments are not allowed
- <sup>2)</sup> The stated tensile load refers to the swivel eye, tensile direction 45 degrees to flange-base
